1 Software installation and program startup

After the software is downloaded successfully, double-click the installation package and install it according to the system prompts. After the installation is successful, a "Start FeiGong Transmission" column will be added to the "Start" menu, and a "FeiGong Transmission" column will also be created on the desktop. A quick launch item for "FeiGong Transmission" (FeiGong Transmission). Double-click the "FeiGong Transmission" shortcut on the desktop or click the "Start FeiGong Transmission" column in the "Start" menu to start the program. Figure 1 shows the login interface after startup.

Figure 1

2 User registration

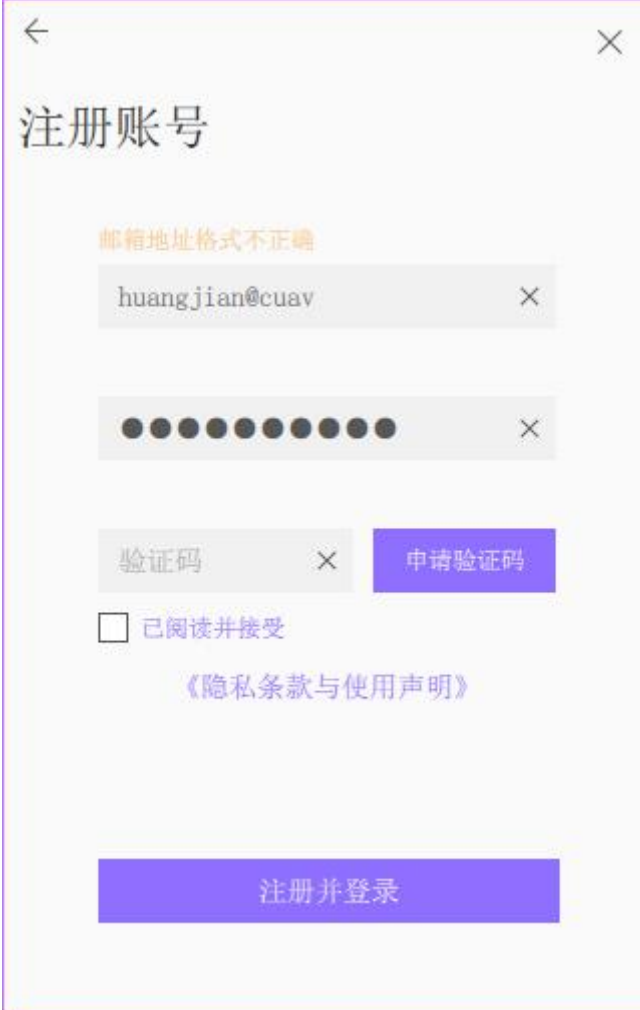

The first-time user needs to register. By clicking the "click to register" button in the upper left corner of the login interface (Figure 1), you can enter the registration interface (Figure 2). After filling in the registered mobile phone or email address and password, click "Apply for verification code" button, the verification code will be sent to the mobile phone or email address, fill in the verification code, and read the "Privacy Policy and Use Statement", click "Read and Accept" to confirm, click "Register and Login" button to complete registration and login. (Note: The format of the account number is: mobile phone number or e-mail address, and the password format is number, uppercase, lowercase, symbols, choose 3 of these formats, with a minimum of 8 digits and a maximum of 16 digits).

The image shows a mobile application registration screen titled "注册账号" (Register Account). It features three input fields: "请输入手机或邮箱" (Please enter mobile phone or email), "请输入密码" (Please enter password), and "验证码" (Verification code). To the right of the verification code field is a blue button labeled "申请验证码" (Apply for verification code). Below these fields is a checkbox labeled "已阅读并接受" (I have read and accepted) followed by the text "《隐私条款与使用声明》" (Privacy Policy and Use Statement). At the bottom of the screen is a large blue button labeled "注册并登录" (Register and login). The interface is clean with a light gray background and blue accents.

Figure 2

When the input format is wrong or the registration fails, the corresponding error message will be displayed on the interface, shown as Figure 3.

The image shows a mobile application interface for registering an account. At the top, there is a title bar with a back arrow on the left and a close 'X' button on the right. Below the title bar, the title '注册账号' (Register Account) is displayed. The main content area contains several input fields and buttons. The first input field is for an email address, with the text 'huangjian@cuav' entered. Above this field, an orange error message '邮箱地址格式不正确' (Email address format is incorrect) is displayed. To the right of the email field is a small 'X' button. Below the email field is a password field represented by a series of black dots, also with a small 'X' button to its right. Under the password field, there is a label '验证码' (Verification code) with a small 'X' button, and a blue button labeled '申请验证码' (Apply for verification code). Below these, there is a checkbox labeled '已阅读并接受' (I have read and accepted) and a link '《隐私条款与使用声明》' (Privacy Policy and Terms of Use). At the bottom of the form is a large blue button labeled '注册并登录' (Register and login).

Figure 3

3 User login

Fill in the corresponding user name and password in the login interface (Figure 4), and click Login. If you need to log in automatically next time, select the option "Auto log in next time" and log in again. When the login fails, a prompt message will be displayed (Figure 5).

Correspondence to the error message

- Login failure, wrong account or password: Check if the account or password is correct

Username: The email/phone number filled in during registration

Password: The password filled in during registration

Username input box: 

Password input box: 

In the password input box, click  to show password, click again to hide the password.

Figure 4

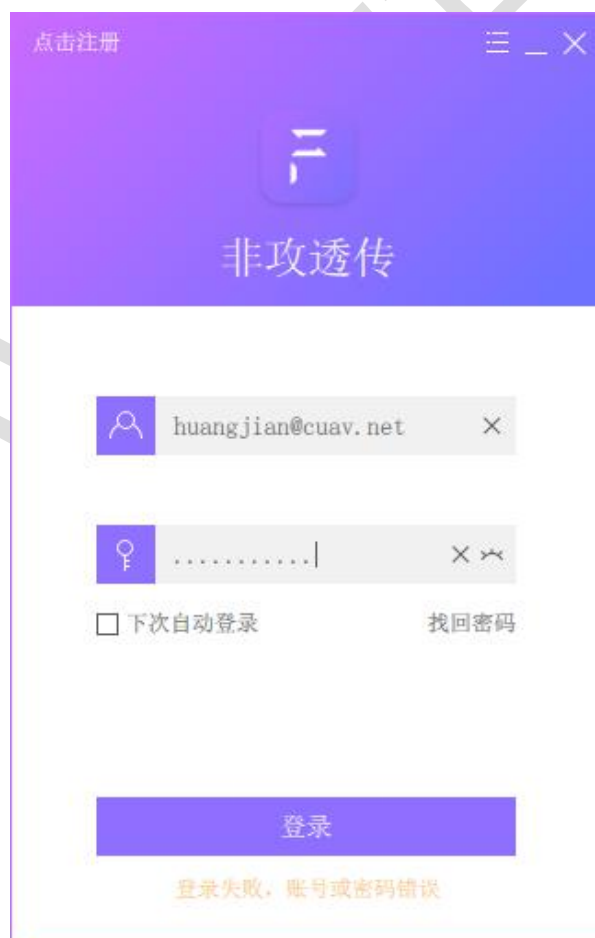

Figure 5

4 Retrieve password

If you forget the password, click the "Retrieve Password" button in the login interface (Figure 4), and the password recovery interface (Figure 6) will appear. After filling in the mobile phone or email address of the corresponding account and the modified password, click "Apply Verification Code", the verification code will be sent to the corresponding mobile phone or email. Fill in the received verification code and click "modify and log in" to complete the modification. (Note: The password format is number, uppercase, lowercase, and symbol, select three of these formats, at least 8 digits, and maximum 16 digits).

Correspondence to the error message

- **Email address is not registered:** Check whether the mailbox is wrong. The error is caused by the unregistered mailbox.
- **Mobile phone number is not registered:** Check whether the mobile phone number is wrong. The error is caused by the unregistered mobile phone number.
- **The verification code application interval is too short:** It takes less than 60 seconds to apply for the verification code twice, just wait 60 seconds and try again.
- **Modify password verification code does not match:** The verification code is 6 digits, check whether there errors.
- **Forgot password and failed to change password:** Check if the password format is wrong.

5 Main interface

When the login is complete, the main interface will appear, you can click on the upper left corner . The option menu pops up (Figure 8), click on the corresponding option to enter different functional interfaces.

Figure 8

6 Team management

Click the option menu in the main interface and select the "Team Management" option, and the team management interface will appear (Figure 9). Click on the upper right corner  The option menu pops up (Figure 10) to create, modify the team name, exit or disband the team.

Figure 9

Figure 10

6.1 Create a team

After clicking the "Create New Team" option, a creation window will pop up (Figure 11). After filling in the corresponding team name, click the "Create" button to create a new team. If the creation is completed, the corresponding team name tab will appear (Figure 12). Click the tab to manage the team. If the creation fails, an error message will be displayed shown as Figure 13.

Correspondence to the error message:

- **Failed to create team, team name already exists:** The name of the team already exists. You cannot create a team with the same name. Refill the team name and try again.
- **Failed to create team, the number of teams has reached the upper limit:** The number of teams created has reached the upper limit, and no more teams can be created.
- **Operation timeout:** Check whether the network is abnormal, if it is normal, the server may be abnormal.

Figure 11

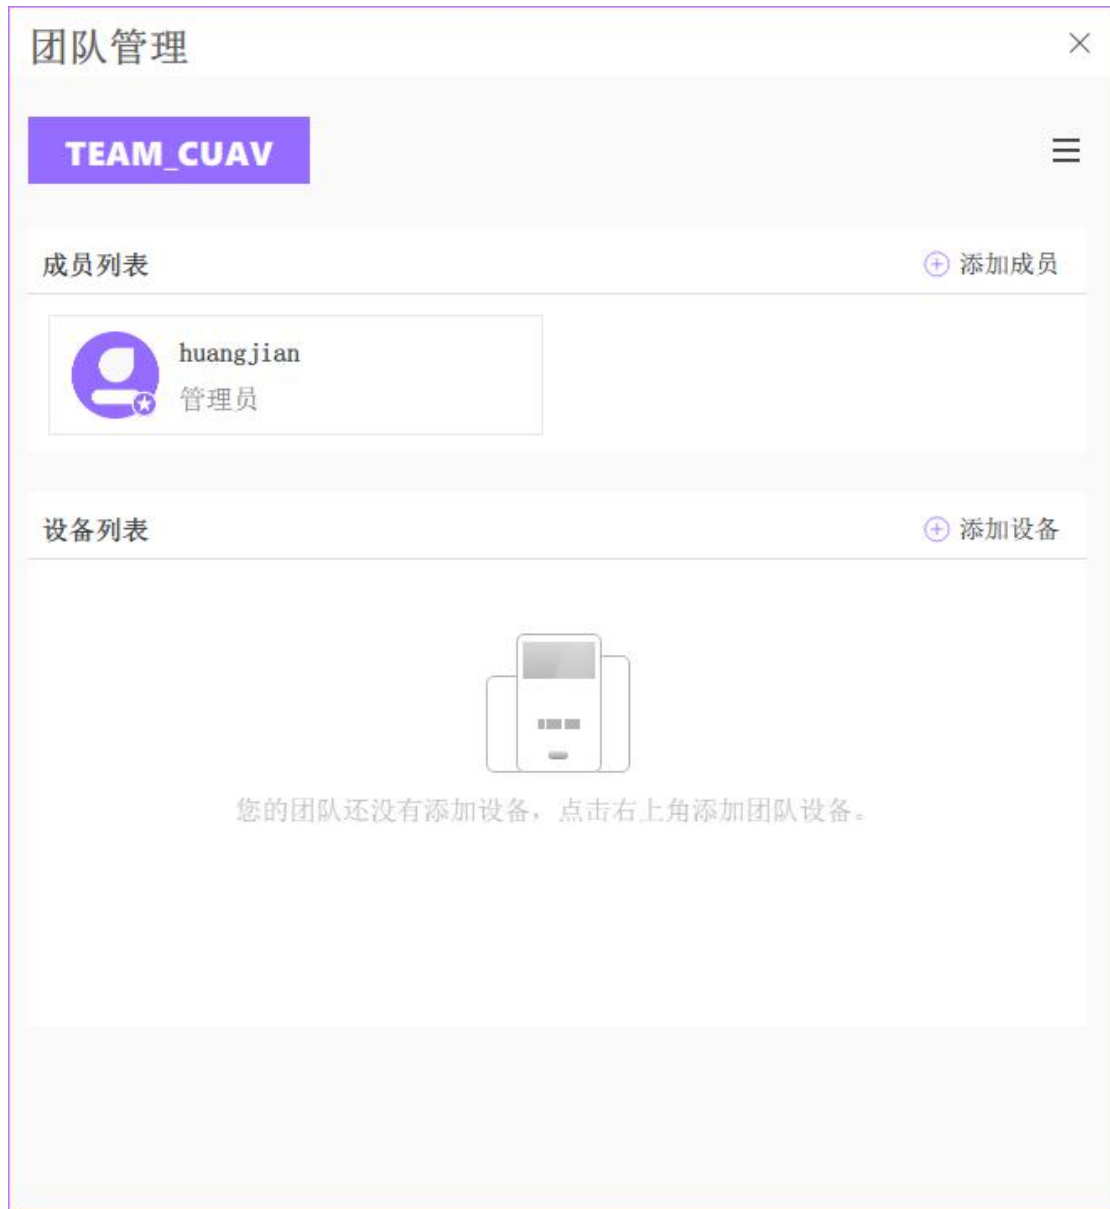

Figure 12

Figure 13

6.2 Edit team name

In the team management interface, select the name tab of the team whose name you want to modify, and click the upper right corner to pop up the option menu, And select "Modify Team Name", the interface for modifying the team name will pop up (Figure 14), after filling in the new team name, click Modify, if successful, the team name will be modified, if the modification fails, an error message will be displayed on the interface for modifying the team name (Figure 15).

Correspondence to the error message:

- **The new and old team names cannot be the same:** The new team name cannot be the same as the current team name, fill in an new team name and try again.

- **Team name already exists:** The name of the team already exists. You cannot create a team with the same name. Refill the team name and try again.
- **Operation timeout:** Check whether the network is abnormal, if it is normal, the server may be abnormal.

Figure 14

Figure 15

6.3 Disband/exit the team

If you need to exit the team or disband the team (administrator), you can click on the pop-up option menu in the upper right corner of the team management interface, and select "Disband Team" or "Exit Team", and a confirmation box will appear after clicking (Figure 16). If you click "Yes", then the dissolution/exit operation will be executed, if you click "No", the operation will be cancelled. If the addition fails, an error message will be displayed in the confirmation box (Figure 16).

Correspondence to the error message:

- **Operation timeout:** Check whether the network is abnormal, if it is normal, the server may be abnormal.

Figure 16

6.4 Add team member

In the team management interface, click the "Add member" button of the team, and the interface for adding members will pop up (Figure 17). After filling in the member account to be invited, click Add, the invitation will be sent (Figure 18), and then wait for the user to confirm to join. If the addition fails, an error message will be displayed in the interface for adding members (Figure 19).

Correspondence to the error message:

- **Operation timeout:** Check whether the network is abnormal, if it is normal, the server may be abnormal.
- **User does not exist:** The invited account does not exist, check whether the account is entered incorrectly.
- **User has joined the team:** The invited user has already joined the team.
- **Invitation sent, waiting for confirmation:** The invitation has been sent to the user, but the user has not yet confirmed, waiting for the user to confirm.
- **User's joined team already reach the upper limit:** The number of teams invited by users has reached the upper limit, the user can no longer be invited to join.

Figure 17

Figure 18

Figure 19

6.5 Remove team member

In the team management interface, select the **...** in the lower right corner of the team member box to be removed in the member list of the corresponding team (Figure 20), the option menu will appear (Figure 21), select "Remove Member", a confirmation box will pop up (Figure 22), click "Yes" to remove the member, otherwise cancel the operation. After the member is successfully removed, the member will be deleted from the member list. If the removal fails, an error message will be displayed in the confirmation box (Figure 22).

Correspondence to the error message:

- **Operation timeout:** Check whether the network is abnormal, if it is normal, the server may be abnormal.

Figure 20

Figure 21

Figure 22

6.6 Add device

In the team management interface, click the "Add Device" button in the team, and the add device interface will pop up (Figure 23). After filling in the CID of the device and selecting the corresponding pilot, click bind and wait for the device side to confirm (Figure 24), the waiting timeout time is 30 seconds. If the device confirms, the device will be added to the team. After the addition is complete, the device will be added to the device list (Figure 25). If the addition fails, an error message will be displayed in the device interface (Figure 26).

Correspondence to the error message:

- **Operation timeout:** Check whether the network is abnormal, if it is normal, the server may be abnormal.
- **Terminal is not online:** The bound terminal device is not online, turn on the terminal device and make sure to connect to the server, try again.
- **The number of bound terminals exceeds the upper limit:** The number of terminal devices bound to the team exceeds the upper limit, you can unbind other terminal devices in the team and try to bind again.
- **Terminal does not exist:** The bound terminal device does not exist, check whether the CID of the terminal is entered incorrectly.
- **Terminal has been bound:** The terminal has been bound, you can check whether it has been bound to a team or personal device. If it has been bound, you can unbind it and bind it again.

Figure 35

Figure 36

7 Notification

After clicking the option menu in the main interface (Figure 8) and selecting the "Message" option, a message notification interface (Figure 37) will pop up. Notifications about team operations will be displayed on this interface, including the invitation to join.

Figure 37

7.1 Team invite to join

After receiving the invitation notification from the team, it will be displayed in the message notification. The notification contains two buttons, "Reject to join" and "Confirm to join". Click "Confirm to join" to agree to the invitation and join the team, shown as Figure 38. When the operation is performed incorrectly, an error message box will be displayed, shown as Figure 39.

Correspondence to the error message:

- **Operation timeout:** Check whether the network is abnormal, if it is normal, the server may be abnormal.
- **Join failed, the team does not exist:** The team does not exist, maybe the team has been disbanded.
- **Join failed, the team is full:** The number of members of the team is full, no more new members can be added, you can contact the team administrator.
- **Join failed, joined team up to the limit:** The number of teams that the user has joined is full, and can no longer join a new team. You can leave the joined team and try again.
- **Failed to join, invalid invitation:** This invitation has expired and the team administrator can invite again.

Figure 38

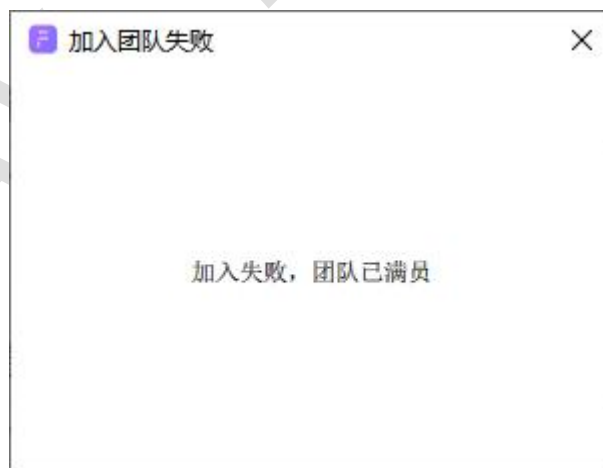

Figure 39

8 Personal device

This function is used to add devices to user accounts, and is distinguished from team devices, it is for personal use.

After clicking the option menu in the main interface and selecting the "Personal Device" option, the personal device interface will pop up (Figure 40). Enter the CID of the device and click the "Bind Device" button to bind. The binding needs to be confirmed on the device. After the binding is completed, the corresponding device information will be added to the device list below, and the device can be renamed and unbound by right-clicking the device pop-up menu (Figure 41).

Corresponding issues with binding error messages:

- **Operation timeout:** Check whether the network is abnormal, if it is normal, the server may be abnormal.
- **Terminal is not online:** The bound terminal device is offline, turn on the terminal device and make sure to connect to the server, try again.
- **The number of bound terminals exceeds the upper limit:** The number of terminal devices bound to the team exceeds the upper limit, you can unbind other terminal devices in the team and try to bind again.
- **Terminal does not exist:** The bound terminal device does not exist, check whether the CID of the terminal is entered incorrectly.
- **Terminal has been bound:** The terminal has been bound, you can check whether it has been bound to a team or personal device. If it has been bound, you can unbind it and bind it again.

Figure 56

11 Personal center

After clicking the option menu in the main interface (Figure 8) and selecting the "Personal Center" option, the Personal Center interface will pop up (Figure 57).

Figure 57

11.1 Change username

In the personal center (Figure 57), click the input box to the right of the nickname and enter the new nickname (Figure 58), click the button on the right to modify the nickname.

Figure 58

11.2 Change phone number

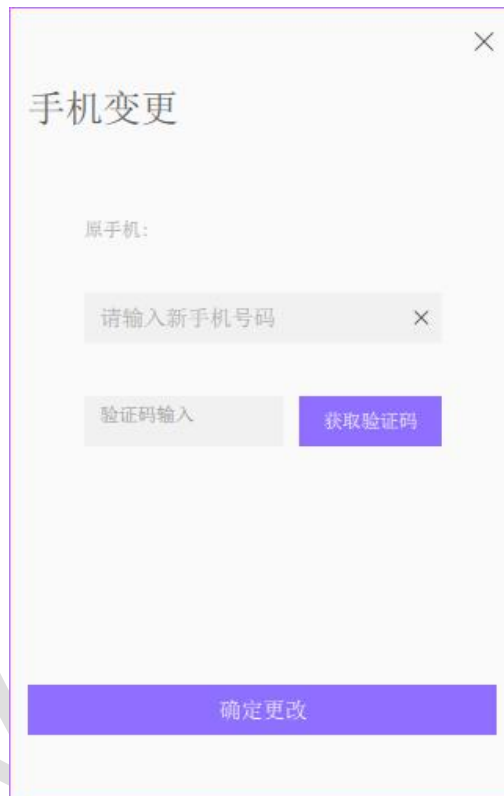

In the personal center (Figure 57), click the button on the right side of the mobile phone field to enter the mobile phone modification interface (Figure 59). After entering the new mobile phone number, click "Get verification code", the verification code will be sent to the new mobile phone number and you will receive it. After filling in the verification code, click Confirm change to complete the modification. When the verification code fails to be obtained or the modification fails, the error message will be displayed on the interface (Figure 60). This picture shows that the verification code fails to be sent due to problems such as a mobile phone format error).

Correspondence to the error message:

- **Operation timeout:** Check whether the network is abnormal, if it is normal,

the server may be abnormal.

- **The mobile phone number has been registered:** The mobile phone number has been used, you can use the mobile phone number to log in, but it cannot be changed.
- **Verification code must be filled:** Try again after filling in the verification code.
- **Operation failed:** Check if the verification code is wrong.

A mobile application dialog box titled "手机变更" (Mobile Change) with a close button (X) in the top right corner. The dialog contains the following elements:

- A label "原手机:" (Original Mobile Phone) followed by a text input field.
- A text input field with the placeholder text "请输入新手机号码" (Please enter new mobile phone number) and a close button (X) on the right.
- A text input field with the placeholder text "验证码输入" (Verification code input).
- A purple button labeled "获取验证码" (Get verification code) positioned to the right of the verification code input field.
- A wide purple button at the bottom labeled "确定更改" (Confirm change).

Figure 59

Figure 60

11.3 Change mailbox

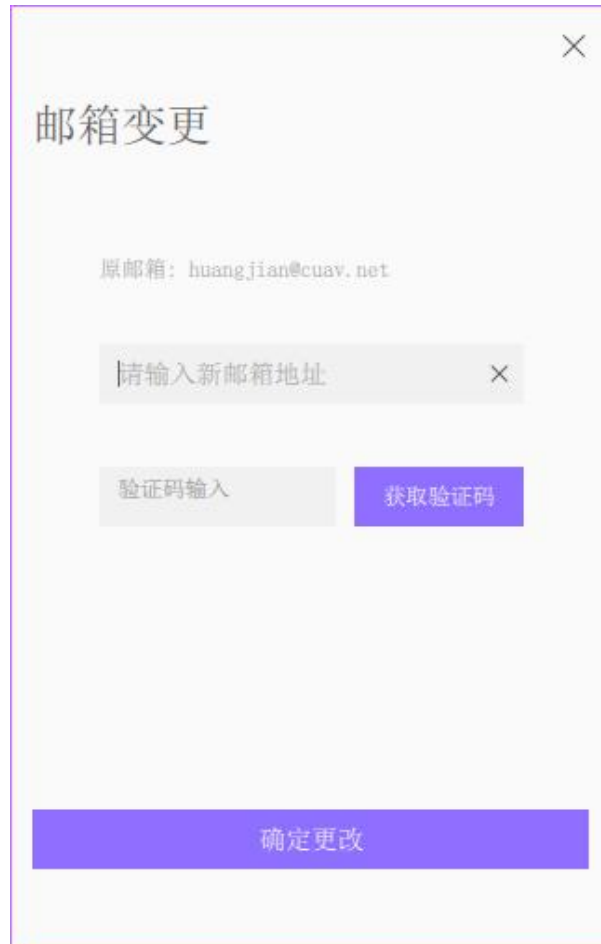

In the personal center (Figure 57), click the button on the right side of the mailbox field to enter the modify mailbox interface (Figure 61). After entering the new mailbox, click "Get verification code". The verification code will be sent to the new mailbox. After filling in the verification code, click Confirm change to complete the modification. When the verification code fails to be obtained or the modification fails, the error message will be printed on the interface (Figure 62, the figure shows the verification code sending failure caused by the incorrect mailbox format).

Correspondence to the error message:

- **Operation timeout:** Check whether the network is abnormal, if it is normal, the server may be abnormal.
- **The mailbox has been registered:** The mailbox has been used, you can use the mailbox to log in, but it cannot be changed.
- **Verification code must be filled:** Try again after filling in the verification

code.

- **Operation failed:** Check if the verification code is wrong.

A dialog box titled "邮箱变更" (Email Change) with a close button (X) in the top right corner. The dialog displays the original email address "原邮箱: huangjian@cuav.net". Below this is a text input field with the placeholder "请输入新邮箱地址" (Please enter new email address) and a clear button (X). Underneath the input field are two buttons: "验证码输入" (Verification code input) and "获取验证码" (Get verification code). At the bottom of the dialog is a large blue button labeled "确定更改" (Confirm change).
